Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 and 12, are rejected under 35 U.S.C. 102(b) as being anticipated by Skilton 610,249. Note upright support rod c, plurality of receptacles A. Note that a depression can be a concavity or a hollow. Regarding claim 12, element B,D can be seen as an upright compartment in that an object may be inserted into aperture D.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8 and 9 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cross 169,962 in view of Liang 5,887,830. Cross teaches an upright support rod E, receptacles C, mounted one above the other on the support rod E. Liang teaches fasteners 2b for the purpose of securing a kitchen utensil. To provide the receptacles C with fasteners 2b as taught by Liang for the purpose of securing items held on the receptacles would have been obvious for one having ordinary skill in the art at the time of the invention.

Claims 13,14,15,16 are allowable.

Reasons for Allowable Subject Matter

Independent claim 13 recites each of the receptacles slidably disposed in u-shaped guides. Independent claim 16 recites at least one receptacle tray comprising a hood covering at least part of the receptacle.

Applicant's amendments necessitated the new grounds of rejection.
